

Engraving Guidelines

Thank you for choosing Etchy Gift for your awards purchase.

Below are some guidelines for choosing the appropriate sized piece for what you want to say.

We provide maximum engraving estimates for each piece.

These are only estimates.

If you have a lot of engraving and a logo, pick a piece that has more room.

If you have long lines of engraving choose a piece that is wide.

The shape of the piece matters as well.

Pieces that are thinner at the top do not allow for longer lines of text in the thin areas.

Your logo shape matters. Taller logo's take up more room vertically and allow for less engraving on thinner pieces.

Some wide logo's may not fit on thin pieces.

Wide logo's do not work well when put on the side of name badges.

We will call you if your engraving does not fit on certain pieces. We will work with you on splitting lines, cutting down engraving or choosing a different piece.

Some pieces may allow for more engraving than the suggested guidelines.

Keep in mind, however, that in certain instances it will make the text smaller.

In reality we can engrave a lot on certain pieces but you may need a magnifying glass to read it.

If you choose a large piece and do not have enough engraving to fill it we may add ornaments or decorative dividers to make it look better.

In some instances there may be an extra charge for excessive engraving.

That charge will depend on the piece and how much extra engraving.

As always we're here to help. Thank you!
